

Revolutionary ONE - STEP Lawn Hydroseeding System INSTRUCTIONS

PLEASE READ THESE INSTRUCTIONS CAREFULLY AND SAVE FOR FUTURE REFERENCE.

The Hydro Grass™ Lawn Hydroseeding System automatically blends the All-In-One Grass Seed, Fertilizer & Mulch Mixture with the Liquid Foaming Formula to help improve adherence to soil and promote more efficient water absorption. The Hydro Grass™ Sprayer Head harnesses the water pressure from your hose for an easy and uniform spray application where you want it - in minutes!

TO USE:

1. PREPARE

- Rake the soil, break up all clods and remove debris and rocks.
- Add an appropriate amount of enriched top soil and spread with a rake.

2. ASSEMBLE

- Pour the desired amount of seed mixture and foaming formula into the seeding container using the guide on container. Refer to the chart for application rates and corresponding foaming formula amounts.
- Attach the Sprayer Head securely to the Seeding Container, making sure it is on securely.
- Making sure the ON/OFF switch is in the OFF position, attach hose and turn on the tap.

3. APPLY SEED

- Open the ON/OFF switch and immediately start spraying. Spray from a height of 1.2m (4 feet) from the ground making sure to spray rapidly and evenly.

4. WATERING

- It is recommended to water gently 2 - 3 times per day for the first 14 days to ensure the soil remains moist. When new lawn growth reaches 5cm (2 inches) gently water once a day.

5. TIPS

- Visit www.buyhydrograss.com to watch the video
- Germinates in 7 to 14 days.
- Ideal seeding season is from the end of April to the end of September.
- To avoid staining, wear gloves when handling. Foaming formula is water soluble, but could stain hands and certain fabrics. If this occurs, wash with a window cleaning solution and rinse immediately with water. (Ordinary soap or detergent may not remove all stains.)
- Do not mow lawn until grass reaches 7cm (3 inches).
- Do not apply in windy conditions. Apply on dry surfaces only.
- Clean spray nozzle with soap and water after use.
- May take up to 24 hrs. to dry. Humans and pets should stay off the newly seeded area until it is completely dry. If another application is required, let area dry completely before re-applying.

APPLICATION RATES

A. OVERSEEDING ESTABLISHED LAWN:

500 g. (1.1lb.) per 65 m² (700 sq.ft.)

B. THIN LAWN & SPOT REPAIR:
