APPLYING HOT JEWELS™ TATTOOS

- 1 Your skin should be clean and free of oils, makeup and lotion. For best results, wash skin before applying tattoos and do not use lotions after tattoos are applied.

- 2 Cut out the tattoos of your choice. 

NOTE: Bracelet and necklace tattoos must be sized on skin and trimmed accordingly.

- 3 Remove the clear protective top sheet. 

- 4 Press the tattoo firmly onto clean, dry skin with the design facing down.

- 5 Wet the back of the tattoo with a damp sponge or cloth. Fully saturate the paper backing of the tattoo. Keep pressure applied.

- 6 Wait 20-30 seconds, then peel off the paper backing.

- 7 Gently pat tattoo dry with a soft cloth. While tattoo is drying, do not stretch skin excessively. Drying may take up to 10 minutes.

Tips For Prolonging Life of Tattoos:

- A. Avoid Rubbing anything against the tattoo area until it dries completely.
- B. After you swim or shower, gently pat dry the tattoo and surrounding area instead of rubbing.

REMOVING HOT JEWELS™ TATTOOS

- 1 Saturate the tattoo with household rubbing alcohol, hand sanitizer, or baby oil. Wait 10 to 20 seconds, then rub the tattoo away with a washcloth.
- 2 After you have finished removing the tattoos, wash the area with soap and water to remove any leftover residue.
- 3 You can also lift the tattoo from dry skin using several pieces of household tape.

**DO NOT APPLY TO SENSITIVE SKIN, OR IF ALLERGIC TO ADHESIVE.
DO NOT USE AROUND THE EYES, NOSE, AND LIPS.
DO NOT INGEST. IF IRRITATION OCCURS, DISCONTINUE USE.**
